## AirConnect-NF Newsletter

Second edition - December 2019

Dear Sir or Madam,

today you will receive the 2nd edition of the newsletter about the innovation project **AirConnect-NF**. Several weeks have passed since the beginning of the project and all participants have started to work actively.

Today we would like to inform you about the results of the kick-off event announced in our last newsletter. Find out more about the two network members GFD GmbH and GreenTEC Campus GmbH.

You are also welcome to follow the events of the project on the homepage at [www.airconnect-nf.de](http://www.airconnect-nf.de).

---

## Successful kick-off event

The kick-off event announced in the last edition at the end of October in Niebüll was a complete success. Interesting lectures, lively exchange and a discussion round with further important topics for the future were the result of the day.

While a login area with presentations of the day is available on the project homepage for project members, we would like to take this opportunity to give you some impressions of the meeting.

## We introduce - two network members

### **GFD GmbH**

GFD GmbH assumes highly specialized tasks in the aviation sector, is comprehensively certified and licensed as an aviation company. For over 50 years, it has been a reliable training partner of the German Armed Forces and regularly works for public and civilian clients in the military environment as well as for research institutions.

The company's history dates back to 1966. Today, more than 180 employees at 7 locations in Germany make use of this experience. GFD GmbH contributes its know-how to the project, helps to build up a network and shows great interest in the project and Leck Airport. (Source: [www.gfd.de](http://www.gfd.de))

## **GreenTEC Campus GmbH**

Nowhere in Germany do more electric vehicles travel per inhabitant than in North Frisia. Entrepreneur Marten Jensen has a share in this. Started in 2005, he has created an industrial park with a training and test field for new

technologies on the former military site in Enge-Sande (North Frisia district) to support the energy revolution: the GreenTEC Campus.

## Outlook next edition

In the next edition, we will report on the progress of the project and on the public presence in published press articles from newspapers and magazines. Furthermore we will present Luftprofile GmbH and Amt Südtondern as project participants. In addition, you will find news about the current status of the project and the further planned work steps as well as about the funding notification.

---

Merry Christmas and a Happy New Year!

The year 2019 is drawing to a close. We use this as an opportunity to wish you and your families a peaceful advent season, happy holidays and a healthy slide into the New Year 2020.

We thank all AirConnect NF project supporters and interested persons for the pleasant and successful cooperation and the trust placed in us. We look forward to keeping you informed about the progress of the AirConnect-NF project in the coming year.
